

# *YOU DESERVE TO BE RICH*

You deserve to be rich because by reading this you are showing a desire to improve yourself. The universal law of attraction is already invoked. To do more, to expand yourself, to increase your knowledge, you must have more resources. Be one with the universe with this and all is yours. Having money is more than just indulging yourself in hedonism. Having money is being able to experience life to the full. If you are constantly worrying about gaining enough money to satisfy just the basics, where do you have time or resources to make life a glorious experience worth living? Having money is about being able to enjoy yourself and have a good time, about being able to surround yourself with beautiful things and be in beautiful places, being able to do good deeds to help others. This is not about having money for money's sake. You need money to fulfill yourself. While there is nothing worthwhile you cannot do or obtain without money, there is too much to experience in life to be able to take it all in unless you have money to facilitate matters. Having money is being able to live life to the full. You must have money so that you can live more.

Money is the medium of exchange, and you need a lot to be able to exchange for the amenities that make life comfortable. It is possible to travel the world without money. It is often done, especially by young people ready to forage and do whatever odd jobs might present themselves. But how much better and more comfortable to do it first class, and how much more of the world will money let you experience. It has been estimated that a Roman citizen in classic Rome would have needed literally thousands of slaves to have the same amenities that a modern average family has due to technology. You don't need thousands of slaves today but you do need money to achieve this comfortable lifestyle.

A lesson from people who have been both rich and poor: they all agree that it is better to be rich. Don't be fooled that some people have given up a high paying job to live a much more enriching lifestyle by doing something they really enjoy. They would all rather be rich as well as doing their new career. These people all took the correct first step to get into doing what they like. They were just not into the next step of also being rich at the same time. There is no reason you cannot be both!

The greatest help that you can be to your fellow travelers on the path is by being the most that you can be. Only wealth will let you be all you can be.

So what is holding you back? It is at least one, and definitely most often more than one, of your Legacies that exalts the benefits of poverty and the status quo for you. The self fulfilling mantra of the nobility of being "poor but honest." The Biblical spiritual idea is that it is harder for a rich man to enter heaven than for a camel to pass through the eye of a needle. Legacies such as these drive your emotions and actions and so your life. YOU are not rich because your beliefs in the appropriateness of your lack of greater riches for yourself are just as strong as any religious belief. And it is your beliefs that ultimately shape your life. There are many shelves full of well researched books on how the mindsets of the rich differ from the thinking of everyday people. Starting with "The Little Engine That Could" to "Think and Grow Rich" to "Rich Dad, Poor Dad" and others there are even more libraries of books that show that with the right belief you can move mountains (which conversely means that wrong beliefs will hold you back just as strongly.) You must be "born again" into the belief of a new status for yourself before the Law of Attraction can do its work. That is why the first section of Accessing Awen is devoted to your discovering yourself so that you know what to change.
